

DFendr - Solar Skirt

A Perfect Choice to Protect Your PV System on Roofs

PV-ezRack® DFendr - Solar Skirt is a mounting accessory to keep birds, wind-blown debris and leaves away from the solar PV system on roofs. The components are easy to install on PV panels with clips, which helps to prevent birds from building nests and debris causing potential temperature rise of PV solar panels and reduce further damage. The use of PA strips and Q345B carbon steel clips makes the Solar Skirt robust and built to last.

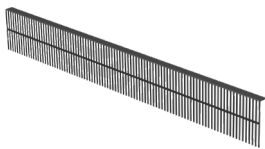

Main Benefits

Quick and Easy Installation Protect your Solar Panel

Using Polyamide, (nylon) as the main material of the Solar Skirt, the product is flexible and can be cut to specification. We use clips to fix the solar skirt to avoid penetration on the solar panel frame, making the solution quite versatile. The strips of Solar Skirt can effectively block the intrusion of birds, small rodents, other debris and leaves.

Excellent UV Resistance

100% recyclable UV resistance Nylon makes the solar skirt built to last and more cost-effective.

Technical Details

Application	PV solar panels with frame (underneath) width $\geq 12\text{mm}$
Fixing method	Clipping on the panel frame
Dimensions	Skirt: W130*L1000*H25 Clip: W28*L33.28*H5
Recommended roof gap	100 – 130 mm
Packaging	Solar Skirt: 30 pcs per carton Clip: 1000 pcs per pack; 2 packs (2000 pcs) per carton
Weight	Solar Skirt: 0.170 kg Clip: 0.011 kg
Material	Solar Skirt: PA66 Clip: Q345B
Color	Black
